

BALANCE YOUR BOOKS — EASILY!!

Introducing . . . **PEGBOOKS™**

A Simple, Straightforward Approach to Computerized Bookkeeping

PEGBOOKS is a Complete Bookkeeping System

Like its name, **PEGBOOKS** resembles the pegboard systems used in most businesses today. But that's where the similarity ends! **PEGBOOKS** maintains all Sales, Receipts, Purchases, Disbursements and the Checking Account all at once!! And, it keeps track of important dates and even tells you ahead of time when and what they are!

PEGBOOKS is Easy to Use

Why pay \$500 for a complex accounting system that you can't even figure out how to turn on, let alone use in everyday business? **PEGBOOKS** was designed to be used by real businesses! It is every bit as simple as paper and pencil systems but far faster, saving you literally hours of time. And, all entries and reports are in English, not "Accountantese" or "Computerese." The manual fully explains the individual functions and even includes a section dedicated to using **PEGBOOKS** in the real world!

PEGBOOKS Lets You Know What's REALLY Going On

Not only do you get reports listing all Sales, Receipts, Purchases, Disbursements, Aged Sales and Purchases, Customer Histories, Checking Account entries and Statements, **PEGBOOKS** will give them to you for today, another day, the month, the year, another year or forever . . . you name it!

PEGBOOKS Even Floats!

Actually, **PEGBOOKS** uses the "Float" date for checks both deposited and written. This is the date you estimate that the check will clear the bank and be deposited into or deducted from your Checking Account. **PEGBOOKS** provides you with two Checking Account reports: One according to your record of checks deposited and written and one according to what is REALLY in the bank! That can be very important when cash flow gets tight!

You need something to make your bookkeeping easier . . .

PEGBOOKS . . . It's all you really need!
